## FEMO SEAL PAD

- Sterile and single use pressure assist device used to assist in obtaining and maintaining hemostasis.
- Safe and effective in reducing active compression time in femoral artery cannulation following diagnostic and intervention procedure.
- Simplify pre and post hemstasis management of the access site, comfortable for the patient, easy to use, provides adjustable active compression and enables immediate pressure adjustment and provides dual benefit of site visibility.
- Used as a sterile dressing to protect the site from contamination.
